

April 21, 2014

To whom it may concern,

The New Hampshire Coalition for Business and Education has voted unanimously to endorse the 10,000 Mentor project of the National Center for Competency Based Learning, a New Hampshire based 501(c)(3). The project is designed to match student interests to community learning opportunities, especially ones that give students the skills they will need to be successful in the real world. At the same time, the project will provide businesses with the opportunity to train students with interest in specific industries, thus opening the door for future employee /employer relationships.

Our organization is committed to greatly enhancing relationships between our students, our schools, and our businesses. We are convinced that, with the right efforts, we can strengthen our system of education and our economy. We believe that mentoring will change lives and that the 10,000 Mentor project is well designed to achieve our goals for the future. We encourage you to fully support the effort.

Sincerely,

Tom Raffio
